

CONRAD 1

Lolium perenne

- Excellent winter colour
- Performs in sport and lawn mixtures
- Very persistent variety
- Excellent resistance to Fusarium patch

Swiss knife

Conrad 1 shows very large adaptation with high rankings in three countries with thorough testing of new turf grass varieties:

RSM Germany 2009 edition:

Fair performance for Ornamental purpose (6) and excellent for Sport (8) and Lawn (8).

STRI UK 2009 edition:

For sport purpose Conrad 1 shows excellent winter greenness important in all regions where the main playing season is autumn-winter-spring. Fineness of leaf and red thread resistance is among the best. For lawn purpose the winter greenness stands out again as well as the fineness of leaf.

Grasgids - The Netherlands 2009 edition:

For sport purpose Conrad 1 is ranking third (out of 27) for overall performance and shows better Fusarium (Microdochium patch disease) resistance and persistency than all other varieties. For lawn purpose Conrad 1 is ranking 8 (out of 29) and again shows the best persistency and Fusarium resistance.

Uses

Sport and lawn where winter performance is important.

Colour

Medium green.

Technical Specifications

- Perennial ryegrass
- Preserves playing quality with superior fusarium patch tolerance
- Listed/recommended in EU
DE NL
