

RUTA

Brassica napus subsp. *napobrassica*

- High palatability
- Good resistance to powdery mildew
- Fast establishing
- Large dual-purpose bulbs with medium dry matter

Rapid Growth and Disease Tolerance

Introducing RUTA – a quick-establishing, dual-purpose swede variety that produces large, bulb-shaped roots with medium dry matter content. With its excellent mildew resistance and high palatability, RUTA is a popular choice among farmers.

High Yield and Hardy Year-Round

Highly yielding and hardy, RUTA requires minimal maintenance and is ideal for both grazing and storage, supporting livestock health and productivity year-round.

Dual Purpose

The purple-skinned, cream-fleshed roots provide high-quality fodder for livestock and are also suitable for culinary use.
