

BRIANNA

Trifolium repens

- White clover for cutting and grazing
- Consistently good yields
- Good tolerance of hard grazing
- Very large leaved
- Potential to replace Red Clover in long term cutting mixtures

Very large leaves

BRIANNA is the largest leaved white clover on the recommended list.

High yields

When sown with grass, Brianna offers high yields of green matter and protein to complement the sward.

Cutting and grazing

Especially suited to cutting and cattle grazing with good tolerance of hard (sheep) grazing for its leaf size.

Persistent

BRIANNA has the potential to replace Red Clover in long term cutting mixtures.
