

GRANDE II

Festuca arundinacea

4salt

Use GRANDE II for lawn and landscape. Tolerates fairly tall cutting height and low maintenance without losing the visually desirable upright growth.

Characteristic for Tall fescues are drought tolerance and tolerance to warm periods. Their deep rooting habit makes the species a suitable candidate for dry and /or low input locations in temperate climate or any Mediterranean setting.

GRANDE II has moderate rhizomes ability. The spread is non-aggressive, but it has the ability to close gaps and cover the area nicely.

Use in mixtures for outstanding density, durability and low maintenance.

Grande II has the advantage that it is suited to a wide range of uses.
