

# MEARA

*Lolium perenne*

- Turf density at high level
- Improved fineness of leaves
- Tolerant to the low input disease, red thread
- Resisting frequent wear

## Add esthetics to your lawn with MEARA

MEARA brings along high shoot density and very fine leaves, the main components to produce very attractive lawns for parks and other recreational areas.

### Disease tolerant

Without disease tolerance the visual merit can be severely affected. MEARA is tolerant to the main diseases, also the "low input" disease red thread which is mainly seen when nitrogen is limited. MEARA = ready to contribute to higher sustainability.

### Frequent wear

MEARA tolerates frequent wear as in playing areas and sport pitches. This makes MEARA a very versatile choice.

## Technical Specifications

- Perennial ryegrass
- Esthetics without compromise & good wear tolerance
- Listed/recommended in EU NL TR UK
